Société d’Etudes et de Montages (SDEM) Erectors Nigeria Limited was founded in Nigeria in 1981 as a subsidiary of the French firm, Société d’Etudes et de Montages, an international contractor specializing in industrial installations and hydraulic works across the world.

The Company became a subsidiary of GEC Alstom Group when GEC Alstom acquired Société d’Etudes et de Montages in France in 1994 and the firm became GEC ALSTOM SDEM. In 1996 GEC ALSTOM decided to refocus on its hydraulics business and divested from the company leading to the spin off of SDEM Erectors Nigeria Limited as an independent company.

SDEM Erectors Nigeria Limited (SDEM) is an energy, industrial and infrastructure construction company specializing in electro-mechanical services, civil and structural construction, steel fabrication, steel structures and industrial equipment erection, operations and maintenance of industrial and energy plants.

In 30 years of operating in Nigeria, SDEM has built some of the most complex industrial installations in Nigeria deploying its considerable local infrastructure and equipment inventory.

SDEM is currently owned 100% by management and a group of investors supporting the management team.
Our Businesses

**SDEM ERECTORS NIGERIA LIMITED (SDEM)** is an energy, industrial and infrastructure construction company serving the following sectors, power, oil and gas, industrial, mining and public utilities.

**SDEM** specializes in the rendering of qualitative service to clients in the following areas:

- Electro-Mechanical
- Erection
- Civil and Structural
- Fabrication
- Operations and Maintenance

**ELECTRO-MECHANICAL SERVICES**

SDEM Erectors has handled various electro-mechanical installations including upgrades and new builds in projects such as:

- Power Generation Plants
- Onshore / Offshore Oil & Gas Facilities
- Water intake and treatment plants
- Process Plants
- Petrochemical Plants
- Breweries & Bottling Plants
- Cement, FMCG Plants, Others

**ERECTION SERVICES**

SDEM manufactures and erects various steel structures and embedded parts. Erection capabilities include:

- Steel structures & portal frames
- Penstocks, water gates & trash racks
- Gantry cranes
- Industrial equipment and machinery
- Cast iron and stainless steel piping

SDEM has handled erection projects such as:

- Steel structures in thermal & hydro power plants
- Penstocks, water gates, stop logs and trash racks in hydro power projects and dams
- Stainless steel piping in breweries & process plants
CIVIL AND STRUCTURAL SERVICES

SDEM offers unparalleled experience and expert delivery across all related civil infrastructure services. Our project scope and capabilities include civil and structural steel construction and erection projects such as:

- Airport Buildings and Ancillary Services
- Industrial and office buildings
- Stadium
- Dams & Irrigation Projects
- Shopping Complexes
- Warehouses
- Aircraft Hangars
- Factories
- Mining Sites
- Roads & Bridges – in JV with MBA Miljkovic of Belgrade

FABRICATION SERVICES

SDEM’s Fabrication capabilities includes:
- Structural steel members
- Piping for both water and gas pipelines
- Stainless and duplex steel piping in process plants
- Steel Framed Structures
- Pipe Bridges
- Storage Tanks
- Jackets, Tripods, & pipe spools
- Manifolds & Skidded Packages
- Palisade fencing
- Miscellaneous steel structures – steel doors and frames, hand rails
- Design and manufacture of steel container buildings for temporary office and construction camp facilities

OPERATIONS AND MAINTENANCE SERVICES

Our capabilities includes:
- Process plant upgrades
- Revamps and remodeling
- Flow stations
- Plant upgrades and commissioning
- Instrument calibrations, diagnosis, loop test etc.
- Valves proving, stroking, calibrations and pressure testing
- Cable trays installation, cabling and terminations
- Onshore mechanical maintenance, hook-up and completions
- Offshore mechanical maintenance, hook-up and completions
- Maintenance blasting and painting
- Bolt torque and tensioning
- Scaffolding services
- Maintenance personnel supply
